TECHNICAL SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, ExpressJS, NodeJS, Typescript, SaaS, Rest API, Git
- **Libraries/Frameworks:** React, Tailwind, Bootstrap, Socket.io, JWT, Axios, Formik, Shadcn-UI, Material-UI, NPM
- **Databases:** SQL, MongoDB, Redis, PostgreSQL, Nginx, AWS DynamoDB, Firebase, System Design
- **Tools / Platforms:** Postman, GraphQL, Github, Google Analytics, VS Code, Cursor, ClaudeAi, Grok/ChatGPT
- **Cloud Tools:** AWS, AWS Lambda, Vercel, Docker, CI/CD Pipeline, Linux, AWS EC2, AWS Route53, AWS S3, AWS IAM

PROFESSIONAL EXPERIENCE

Infotact solutions

Bangalore, India

Full Stack Web developer Intern

July-2025 – October-2025

- Lead a team of developers to design, develop, test, and deploy responsive web applications according to project requirements
- Accredited as **Team Leader**, managing project workflows, assigning tasks, and mentoring junior developers to improve their technical and problem-solving skills.
- Successfully delivered two end-to-end projects in three months, overseeing architecture design, **Back-end APIs**, front-end integration, and deployment.
- Developed and maintained comprehensive technical documentation for codebases, **Version control** testing, **APIs, workflows**, and system designs to ensure knowledge transfer and project scalability.

PERSONAL PROJECTS

URL Shortener with Dashboard built with MERN (MongoDB, Express, React, Node)s.js

[Live Link](#)

- Click-url is a JavaScript-based web application that allows users to shorten long URLs into compact **5-character short links**. Built using a modern tech MERN stack, this project provides a responsive front-end and a secure, scalable back-end.
- The site serves as an interactive click URL handler or redirect service, highlighting expertise in building lightweight, responsive web endpoints for user engagement or data tracking purposes, with Dashboard.
- Successfully launched and maintained a live Web project, emphasizing rapid prototyping, version control integration, and reliable online accessibility for portfolio demonstration
- Matric Like **Total View** And **Total Link** in dashboard page implement CRUD operation Delete The link You also Update profile With Form Validation

E-Commerce Web Application built with MERN (MongoDB, Express, React, Node.js)

[Live Link](#)

- Developed a full-stack online shopping platform enabling user registration, product browsing, cart management, checkout, and order tracking. Utilized JWT-based authentication and protected routes to ensure secure access.
- Admin panel for managing products (create, read, update, delete), orders, and users with Dashboard Admin dashboard operations (product creation, update) handled in under **0.5 seconds**
- Integrated Razorpay (or other payment gateway) for secure online payments.
- Guest and Login user merging checkout like Myntra.
- Supported **more than 1,000 users and 500 products** in production environment
- Implemented multi-attribute product filtering (category, size, color, material, price range) and search functionality, and Optimized performance and responsive UI using React, Redux, and efficient API calls

React + PostgreSQL + Supabase Authentication — JWT, Email Verification, OTP, Forgot, Change Password

[Github Link](#)

- Building a complete authentication system using React (frontend), PostgreSQL (database), and Supabase (backend/auth service). Integration between frontend React and Supabase backend via REST / API calls..
- Implementation of JWT (JSON Web Token) for secure token-based authentication.
- Email verification flow: sending verification links to new users and validating them using **Nodemailer**
- Email **OTP (One-Time Password)** for enhanced security. Security best practices: storing tokens safely, validating inputs, handling errors, and maintaining session state.
- Feature like **Forgot password** and **Change password** flows: secure reset links/token validation and updating passwords.

EDUCATION

Garden City University

Bangalore, Karnataka, India

Master Of Computer Application, GPA: 8./10.0

July 2024 - June 2026

- Coursework: Advanced Data Structures, Database Management Systems, Cloud Computing

CERTIFICATIONS

- UI Full Stack Web Development - **Naresh i Technologies - Hyderabad**
- 30 Days of JavaScript - LeetCode
- Postman API Fundamentals Student Expert
